# NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Director of Research and Policy Analysis Holly Wade are responsible for the report.

## **SUMMARY**

### **OPTIMISM INDEX**

The Optimism Index decreased by 2.8 points in July to 99.7, reversing nearly the entire 2.9-point gain in June's report. Six of the 10 Index components declined, three improved, and one was unchanged. The NFIB Uncertainty Index decreased 7 points to 76. Sales expectations over the next three months decreased 11 points to a net negative 4 percent of owners. Owners expecting better business conditions over the next six months decreased 8 points to a net negative 20 percent. Earnings trends over the past three months decreased 8 points to a net negative 13 percent. Forty-nine percent of owners reported job openings that could not be filled, an increase of 3 points from June and a 48-year record high.

### **LABOR MARKETS**

Small businesses continue to struggle to find workers to fill open positions. Forty-nine percent (seasonally adjusted) of all owners reported job openings they could not fill in the current period, up 3 points from June and a record high reading. Unfilled job openings have remained far above the 48-year historical average of 22 percent. Fortythree percent have openings for skilled workers (up 3 points) and 25 percent have openings for unskilled labor (up 3 points). Fifty-nine percent of the job openings in construction are for skilled workers, down 1 point. Overall, 61 percent reported hiring or trying to hire in July, down 2 points from June. The issue will be whether the supply of labor will cooperate. Owners' plans to fill open positions remain at record high levels, with a seasonally adjusted net 27 percent planning to create new jobs in the next three months, down 1 point from June's record high reading. Finding qualified employees remains a problem. Fifty-seven percent (93 percent of those hiring or trying to hire) of owners reported few or no "qualified" applicants for the positions they were trying to fill in July (up 1 point). Where there are open positions, labor quality remains a significant problem. Thirty-one percent of owners reported few qualified applicants for their open positions (down 1 point) and 26 percent reported none (up 2 points), a 48-year record high.

### **CAPITAL SPENDING**

Fifty-five percent reported capital outlays in the last six months, up 2 points from June but historically not strong. Capital spending is critical to the growth of the economy and increased output and income. Of those making expenditures, 39 percent reported spending on new equipment (up 3 points), 23 percent acquired vehicles (unchanged), and 14 percent improved or expanded facilities (down 2 points). Six percent acquired new buildings or land for expansion (unchanged) and 11 percent spent money for new fixtures and furniture (unchanged). Twenty-six percent plan capital outlays in the next few months, up 1 point from June. Capital investment (equipment, technology etc.) is the key to improvements in worker productivity, and consequently, worker compensation. But owners have a very dim view of prospects for business conditions and sales growth needed to support the demand for new equipment and expanded capacity.

### **SALES AND INVENTORIES**

A net 5 percent of all owners (seasonally adjusted) reported higher nominal sales in the past three months, down 4 points from June. The net percent of owners expecting higher real sales volumes declined 11 points to a net negative 4 percent. It appears that owners are losing confidence in the strength of the economy. The net percent of owners reporting inventory increases declined 7 points to a net negative 6 percent. This is due primarily to the very strong levels of sales and the inability of owners to replenish inventories through their supply chains. A net 12 percent of owners view current inventory stocks as "too low" in July, up 1 point from June and historically a record high. However, replenishing the inventories sold is not easy. Over 30% of small businesses reported that supply chain disruptions have had a significant impact on their business(es). A net 6 percent of owners plan inventory investment in the coming months, down 5 points from June, a historically high reading.

### **COMPENSATION AND EARNINGS**

Seasonally adjusted, a net 38 percent reported raising compensation, down 1 point from June's record high of 39 percent. A net 27 percent plan to raise compensation in the next three months, up 1 point from June and a 48-year record high reading. Nine percent cited labor costs as their top business problem (up 1 point) and 26 percent said that labor quality was their top business problem, unchanged from June but remaining the top overall concern. The frequency of reports of positive profit trends declined 8 points to a net negative 13 percent, driven primarily by the increase in sales. Among owners reporting lower profits, 32 percent blamed weaker sales, 31 percent cited a rise in the cost of materials, 10 percent cited labor costs, 7 percent cited lower prices,6 percent cited the usual seasonal change, and 3 percent cited higher taxes or regulatory costs. For owners reporting higher profits, 62 percent credited sales volumes, 20 percent cited usual seasonal change, and 7 percent cited higher prices.

### **CREDIT MARKETS**

Two percent of owners reported that all their borrowing needs were not satisfied (down 1 point). Twenty-three percent reported all credit needs met (down 2 points) and 61 percent said they were not interested in a loan (up 2 points). A net 2 percent reported their last loan was harder to get than in previous attempts (unchanged). One percent reported that financing was their top business problem (unchanged). The net percent of owners reporting paying a higher rate on their most recent loan was 1 percent, unchanged from June. The average rate paid on short maturity loans was 4.9 percent, unchanged from June. Twenty-one percent of all owners reported borrowing on a regular basis (unchanged).

### **INFLATION**

The net percent of owners raising average selling prices down 1 point to a net 46 percent, seasonally adjusted. Unadjusted, 5 percent (unchanged) reported lower average selling prices and 52 percent (down 2 points) reported higher average prices. Seasonally adjusted, a net 44 percent plan price hikes (unchanged). In July, 52% reported raising average selling prices, 2 points higher than in June. Of those who raised compensation (41%), 62% raised average selling prices. Among those who raised compensation "a lot" (5%), 13% raised prices by 10% or more. That is a considerable amount of price pressure.

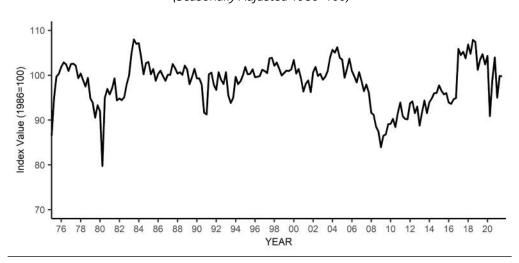

## **COMMENTARY**

Real growth in the economy remains solid, over 6% in real terms in Q2, a historically high reading. The level of GDP has now exceeded the 2019 peal, although employment has not. Fewer workers are making more stuff. To a large extent this is because we switched much of our spending from services (a labor-intensive industry sector) to goods production during the Pandemic. Employment will "re-balance" as consumers adjust their spending, but now dependent on the ability for the service sector to staff up to meet increased demand. Hiring in the restaurant etc. sector continues to lead the job creation parade, but remains a frustrating task for owners who are unable to fill open positions. The virus continues to create uncertainty about its impact on people and the response of government regulators.

The government stimulus that powered spending in the first half of the year will start to fade, slowing GDP growth. Consumers banked a lot of that money, especially higher income earners, driving savings deposits to \$2 trillion higher than pre-Pandemic levels. Inventories are especially low and replenishment will contribute to economic growth as soon as supply chain disruptions get untangled. Economic disruptions related to Covid will likely continue to into 2022 for many. Overall, the second half will be OK, what we take into 2022 remains to be seen.

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?	4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?	5
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?	6
If higher or lower, what is the most important reason?	6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?	7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?	7
How are your average selling prices compared to three months ago?	8
In the next three months, do you plan to change the average selling prices of your goods and/or services?	8
During the last three months, did the total number of employ in your firm increase, decrease, or stay about the same?	
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?	9
Do you have any job openings that you are not able to fill right now?	10
In the next three months, do you expect to increase or decrease the total number of people working for you?	10
Over the past three months, did you change the average employee compensation?	11
Do you plan to change average employee compensation during the next three months?	11

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Areloans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	. 17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	. 19
How many employees do you have full and part-time, including yourself?	19
