## SMALL BUSINESS OPTIMISM INDEX COMPONENTS

## NFIB SMALL BUSINESS ECONOMIC TRENDS

NFIB Research Center has collected Small Business Economic Trends Data with Quarterly surveys since 1973 and monthly surveys since 1986. The sample is drawn from the membership files of the National Federation of Independent Business (NFIB). Each was mailed a questionnaire and one reminder. Subscriptions for twelve monthly SBET issues are \$250. Historical and unadjusted data are available, along with a copy of the questionnaire, from the NFIB Research Center. You may reproduce Small Business Economic Trends items if you cite the publication name and date and note it is a copyright of the NFIB Research Center. © NFIB Research Center. ISBS #0940791-24-2. Chief Economist William C. Dunkelberg and Director of Research and Policy Analysis Holly Wade are responsible for the report.

## **SUMMARY**

## **OPTIMISM INDEX**

The Index of Small Business Optimism fell 2.3 points to 103.0 in September, a significant decline from August. Three of the 10 Index components posted a gain, six declined and one was unchanged. Two of our largest states, Florida and Texas, were devastated by hurricanes in the survey period; however, the response rate in those states was unchanged from prior months. The mail got through, but for large parts of the two states, "shopping" was not possible. Tens of thousands of houses were probably lost and a half million cars rendered inoperable. Hurricane recovery spending will provide a significant boost to economic activity in the fourth quarter and into 2018, reducing the odds of a recession next year. The news about tax reform came out too late to have a significant impact on expectations, the October survey will reflect whatever impact that debate will have.

## LABOR MARKETS

Job creation weakened in the small business sector as business owners reported an adjusted average employment change per firm of -0.17 workers. Decreases were reported by owners in six of the nine Census regions, so it wasn't just a hurricane effect. Twelve percent (down 2 points) reported increasing employment an average of 2.7 workers per firm and 13 percent (up 1 point) reported reducing employment an average of 2.0 workers per firm (seasonally adjusted). Fifty-seven percent reported hiring or trying to hire (down 2 points), but 49 percent (86 percent of those hiring or trying to hire) reported few or no qualified applicants for the positions they were trying to fill. Nineteen percent of owners cited the difficulty of finding qualified workers as their Single Most Important Business Problem (unchanged), second only to taxes. This is the top ranked problem for those in construction (30 percent) and manufacturing (28 percent), getting more votes than taxes and regulations. Thirty percent of all owners reported job openings they could not fill in the current period, down 1 point. Eleven percent reported using temporary workers, down 2 points. A seasonally adjusted net 19 percent plan to create new jobs, up 1 point from August, a strong reading.

## **CAPITAL SPENDING**

Fifty-nine percent reported capital outlays, down 1 point. Of those making expenditures, 39 percent reported spending on new equipment (down 3 points), 23 percent acquired vehicles (down 1 point), and 13 percent improved or expanded facilities (down 3 points). Six percent acquired new buildings or land for expansion (down 1 point) and 12 percent spent money for new fixtures and furniture (up 3 points). The percent of owners planning capital outlays fell 5 points to 27 percent. The recovery from the hurricanes will undoubtedly raise these numbers. Plans were most frequent in agriculture (29 percent), the wholesale trades (28 percent), and manufacturing (38 percent).

This survey was conducted in September 2017. A sample of 5,000 small-business owners/members was drawn. Six hundred and twenty-nine (629) usable responses were received – a response rate of 12 percent.

## SALES AND INVENTORIES

The net percent of all owners (seasonally adjusted) reporting higher nominal sales in the past three months compared to the prior three months was a net 1 percent, a 2 point decline from August. Seasonally adjusted, the net percent of owners expecting higher real sales volumes lost 12 points, falling to a net 15 percent of owners, this after large gains in July and August. What triggered such a large decline in expectations is less clear, as reports on the economy (e.g. 3.1 percent GDP growth in the second quarter etc.) were fairly good. Respondents in Florida and Texas were no less optimistic than their counterparts in the rest of the country.

The net percent of owners reporting inventory increases fell to a net negative 2 percent (seasonally adjusted), a decline of 3 points, indicating more inventory reduction than in August. The net percent of owners viewing current inventory stocks as "too low" gained 2 points to a net negative 3 percent. The net percent of owners planning to add to inventory rose 5 points to a net 7 percent.

## **CREDIT MARKETS**

Two percent of owners reported that all their borrowing needs were not satisfied, down 1 point and historically very low. Thirty-three percent reported all credit needs met (down 1 point) and 51 percent said they were not interested in a loan, up 2 points. Only 1 percent reported that financing was their top business problem compared to 21 percent citing taxes, 16 percent citing regulations and red tape, and 19 percent the availability of qualified labor. Twenty-nine percent of all owners reported borrowing on a regular basis (down 2 points). The average rate paid on short maturity loans was up 10 basis points at 5.6 percent, little changed even as the Federal Reserve raises rates.

## **COMPENSATION AND EARNINGS**

Reports of higher worker compensation fell 3 points to a net 25 percent, still historically strong. The Federal Reserve is hoping this will result in inflation as owners pass these costs on in the form of higher selling prices, but to date, their wish has not been granted to any significant degree. Plans to raise compensation rose 3 points in frequency to a net 18 percent, a logical response to labor market tightness. The frequency of reports of improved profit trends was unchanged at a net negative 11 percent reporting quarter on quarter profit improvements, historically a solid reading and one of the best readings in this expansion.

## **INFLATION**

The net percent of owners raising average selling prices declined 3 points to a net 6 percent. Clearly, inflation is not "breaking out" across the country as the Federal Reserve hoped. Ten percent of owners reported reducing their average selling prices in the past three months (up 1 point), and 15 percent reported price increases (down 2 points). Seasonally adjusted, a net 19 percent plan price hikes (down 1 point), a figure that has typically been 2 to 3 times larger than the percent that a month later report actually raising prices.

## COMMENTARY

Second quarter GDP growth was revised upward to 3.1 percent, the best growth rate in years. Third quarter growth will be hampered by the hurricanes in our 2nd and 4th largest states. Shopping was difficult without a boat and if your boat made it to your workplace, it may have been flooded or without power. Rebuilding will add to growth in the fourth quarter, but replacing assets that were lost is not an optimal use of funds, even if necessary. It only replaces wealth lost rather than adding new productive assets to our economy. Third quarter estimates of growth from the Atlanta and New York Federal Reserve Banks range from 2.7 percent to 1.5 percent respectively. Another 3 percent growth quarter is not likely for Q3. However, Q4 is shaping up to be better, even before hurricane recovery stimulus.

The Federal Reserve announced the plan to reduce its \$4.5 trillion portfolio. Other things equal, the withdrawal of Federal Reserve demand for Treasury bonds to replace those coming due will put an upward pressure on interest rates. However, other factors such as foreign demand for U.S. securities could easily overwhelm this in the early stages of portfolio reductions. The Federal Reserve will raise its benchmark rate in December in an attempt to produce a federal funds rate that is more "normal" and further away from the "zero floor," just in case the economy falters and the Fed needs to cut rates.

Owner optimism posted a decline but remained historically very high, driven primarily by reduced optimism about sales, business conditions and the environment for expanding a business. However, fundamental Index components were stronger, with gains in hiring plans and inventory investment plans. Capital spending plans were weaker but down from a very high level last month, returning to levels more typical this year. With recent improvement in other economic indicators including the September ISM Non-Manufacturing Index which is at its highest since 2005, and the prospect of recovery spending, the fourth quarter doesn't look bad at all.

## **NFIB RESEARCH CENTER SMALL BUSINESS ECONOMIC SURVEY**

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN	REPORT
Do you think the next three months will be a good time for small business to expand substantially? Why?		4
About the economy in general, do you think that six months from now general business conditions will be better than they are now, about the same, or worse?		5
Were your net earnings or "income" (after taxes) from your business during the last calendar quarter higher, lower, or about the same as they were for the quarter before?		6
If higher or lower, what is the most important reason?		6
During the last calendar quarter, was your dollar sales volume higher, lower, or about the same as it was for the quarter before?		7
Overall, what do you expect to happen to real volume (number of units) of goods and/or services that you will sell during the next three months?		7
How are your average selling prices compared to three months ago?		8
In the next three months, do you plan to change the average selling prices of your goods and/or services?		8
During the last three months, did the total number of emploin your firm increase, decrease, or stay about the same?	-	9
If you have filled or attempted to fill any job openings in the past three months, how many qualified applicants were there for the position(s)?		9
Do you have any job openings that you are not able to fill right now?		10
In the next three months, do you expect to increase or decrease the total number of people working for you?		10
Over the past three months, did you change the average employee compensation?		11
Do you plan to change average employee compensation during the next three months?		11

SMALL BUSINESS SURVEY QUESTIONS	PAGE IN REPORT
Areloans easier or harder to get than they were three months ago?	12
During the last three months, was your firm able to satisfy its borrowing needs?	13
Do you expect to find it easier or harder to obtain your required financing during the next three months?	13
If you borrow money regularly (at least once every three months) as part of your business activity, how does the rate of interest payable on your most recent loan compare with that paid three months ago?	14
If you borrowed within the last three months for business purposes, and the loan maturity (pay back period) was 1 year or less, what interest rate did you pay?	14
During the last three months, did you increase or decrease your inventories?	15
At the present time, do you feel your inventories are too large, about right, or inadequate?	15
Looking ahead to the next three months to six months, do you expect, on balance, to add to your inventories, keep them about the same, or decrease them?	15
During the last six months, has your firm made any capital expenditures to improve or purchase equipment, buildings, or land?	16
If [your firm made any capital expenditures], what was the total cost of all these projects?	17
Looking ahead to the next three to six months, do you expect to make any capital expenditures for plant and/or physical equipment?	17
What is the single most important problem facing your business today?	18
Please classify your major business activity, using one of the categories of example below	19
How many employees do you have full and part-time, including yourself?	19
